

ABSTRACT

A printed board unit includes a mother board 60, and a first board unit 70-1 and a second board unit 70-2 that face each other and are
5 vertically mounted onto the mother board 60 with connector devices 100-1 and 100-2. The first board unit 70-1 has memory mounting boards 81-1 horizontally mounted to a region near the lower end of a vertically standing daughter board 71-1. The
10 second board unit 70-2 has memory mounting boards 81-2 horizontally mounted to a region near the upper end of a vertically standing daughter board 71-2. The memory mounting boards 81-1 of the first board unit 70-1 are arranged on the lower side, while the
15 memory mounting boards 81-2 of the second board unit 70-2 are arranged on the upper side.
